Smart thermostats with mobile app

It makes sense. Finally!

Smart heating control provides you with comfort and flexibility. Ensto's panel heaters and floor heating thermostats are equipped with a smart electronic thermostat which means that they can easily be controlled by a mobile device.

The Ensto Heat Control application allows you to control Ensto heaters and floor heating thermostats that are equipped with Bluetooth technology. You can create a weekly or longer-term program for your desired period, as well as being able to track their impact on your home's energy consumption. Using Ensto Heat Control App to manage your home heating is easy, efficient and reliable.

What you can do on the app:

- Temperature management
- Selecting a thermostat mode:
 - Floor
 - Room
 - Combination
 - Power
- Calendar programs
 - Set a required temperature and starting time
- Holiday periods
 - Longer period temperature changes
- Boost
 - Temporary temperature change
- Manage schedules
 - Day-to-day with six temperature change cycles
- Reduce energy costs (energy consumption monitoring)
 - Current energy consumption
 - Weekly and annual energy consumption
 - Weekly temperature monitoring

The app can help you control heating, edit settings, update your product and more.

Ensto Heat Control Tutorial

Ensto Beta heaters

With connection box or plug

Beta heaters can be installed in both dry and damp areas (IP21). The heaters also have a low surface temperature due to the X-shaped heating element. The heaters can be wall mounted or free standing (with separate feet).

BETA-EB

- > Connection box
- > RAL9010 colour
- > Extremely accurate and completely silent intelligent thermostat, accuracy +/-0.1°C
- > Fast reaction to temperature changes, which helps to increase comfort and ensures an even room temperature
- > The heater's surface temperature is low thanks to the intelligent thermostat
- > Manage intelligent functions with the Ensto Heat Control App
- > Standby consumption <0.3W

BETA-MP

- > Mechanical thermostat and plug
- > RAL9010 colour
- > Accurate temperature control with +/-0.5°C thermostat accuracy
- > A mechanical thermostat is better able to withstand network disturbances and is therefore suitable for use in cottages etc.

Ensto Beta heaters with intelligent thermostat and connection box

Beta heaters meet the Ecodesign requirements. The new heaters are equipped with intelligent thermostats (6 - 30°C) that can be controlled manually or with the Ensto Heat Control App (Android and iOS). The Ensto Heat Control application permits calendar control, boost and holiday function, and also the monitoring of heating consumption. Nominal voltage 230 V + 10%, -15%. Protection class IP21. Height of the heater is 389mm.

Portable Ensto Beta heaters with mechanical thermostat and Euro plug

Portable Beta heaters meet the Ecodesign requirements. Portable heaters are equipped with mechanical thermostats (6 - 36°C), Euro plug and heater legs. The accuracy of the thermostat is +/- 0.5°C. Thanks to the control wheel and a simple scale, adjusting the temperature is easy. Nominal voltage 230 V +10%, -15%. Protection class IP21. Height of the heater with legs is 460 mm.
